PROFILE

After four years in Japan's hospitality industry, I wanted to build something that scales impact beyond one-on-one service. That led me to Le Wagon's intensive full-stack bootcamp in Ruby on Rails and JavaScript. I've always been drawn to learning new tools and pushing myself creatively, which is why I'm driven to create software that makes daily life easier for users and the people behind it. I bring business-level Japanese and English from working in multicultural environments, and I'm looking to join a team where I can grow while shipping real-world products.

EDUCATION

AI Software Development Bootcamp at *Le Wagon Tokyo*

Oct 2025 — Dec 2025

Intensive 9-week full-stack program focused on web development, databases, APIs, and AI integration. Pair programming, code reviews, and project-based learning to build Ruby on Rails & JavaScript applications.

TECHNICAL SKILLS

Ruby	JavaScript	Ruby on Rails	PostgreSQL	Git/GitHub
HTML/CSS/SCSS	Stimulus/Turbo	RESTful APIs	Heroku	RSpec/TDD
Agile/Scrum	MVC/OOP	AI Integration	PWA	Figma

PROJECTS

Nihongo Hero | Rails, JS, PostgreSQL, TTS API |  github.com/ShinOWfu/Nihongo-Hero | nihongohero.quest

A gamified Japanese language learning app with RPG-style turn-based combat. Led 4-person team development of the final Le Wagon project in two weeks, designing database architecture, integrating VoiceVox TTS API, and serving as top contributor. Deployed as mobile-first PWA.

Adventure Maker | Rails, PostgreSQL, Google Gemini API |  github.com/ShinOWfu/AdventureMaker

AI-powered interactive storytelling platform with branching narratives. Developed LLM prompt engineering for dynamic story generation, implemented Gemini API image generation, and built a psychological assessment system analyzing user decision patterns. Solved challenge of maintaining narrative consistency despite free-form user input.

Tenki Weather | JavaScript, HTML5, CSS3, OpenWeatherMap API |  github.com/LeoCba07/tenki-app

Weather app built solo while working full-time. Implemented async/await patterns, REST API integration with error handling, and implemented responsive dark mode toggle.

PROFESSIONAL EXPERIENCE

Front Office Host, Hyatt Centric Ginza Tokyo

Oct 2024 — Oct 2025

- Managed high-volume workflows using Property Management Systems; resolved technical issues and coordinated with IT team for system troubleshooting

Front Office Agent, Okinawa UDS, Miyakojima (Part-time)
