LEANDRO TRABUCCO

FULL STACK DEVELOPER

leandrotrabucco@gmail.com | Oncativo, Córdoba, Argentina (UTC-3)
linkedin.com/in/leandro-trabucco | github.com/LeoCba07 | leandrotrabucco.me

PROFILE

Full-stack developer with production applications across web and mobile: a multi-tenant POS system live with its first paying client, a Next.js commercial site for a 30-year-old business, and a React Native app live on Google Play. Le Wagon Tokyo graduate, currently completing a Computer Programming degree at UTN. Four years in Japan's luxury hospitality before moving into software, working daily across three languages. Based in Argentina, looking for a junior full-stack role on a remote team.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Ruby, SQL / PL-pgSQL, HTML, CSS

Frontend: React, React Native (Expo / EAS Build), Next.js, Electron, Tailwind CSS, Zustand

Backend: Ruby on Rails, Node.js, PostgreSQL, Supabase (Row-Level Security), PostGIS, RESTful APIs

Testing & Tools: GitHub Actions (CI), Git/GitHub, Vercel, Sentry, Docker, Figma, GA4, Vitest, Jest

PROJECTS - Full portfolio: *leandrotrabucco.me*

Agile | *Electron, React, Supabase, PostgreSQL* | *Live with first paying client* | Private repo
Multi-tenant point-of-sale system for Argentine kiosks, co-built with a small team. Built the React admin interface and Electron POS front end, including offline-state UX that lets operators complete sales with no connectivity and surfaces sync status without interrupting the till. Codebase covered by 737 automated tests with a CI gate on every PR.

Jidou Navi | *React Native, TypeScript, Expo, Supabase, PostGIS* | *Available on Google Play* | jidou-navi.app
Mobile app for discovering Japan's vending machines, with an interactive map and gamified XP and badge check-ins. Check-ins are verified server-side with PostGIS geofencing capped at 200m, so location can't be spoofed from the client. Sole developer across frontend, backend, and Play Store deployment.

El Alto | *Next.js, TypeScript, Tailwind, Sanity, GA4* | github.com/LeoCba07/el-alto-website | complejoelalto.com.ar
Freelance rebuild for a 30-year-old cabin-rental business. Built a WhatsApp contact form pre-filling dates and guest count, addressing an inquiry flow the owner reported as roughly 80% incomplete, plus a headless CMS for owner self-service. Hand-written CSP and security headers, continuous deployment on Vercel.

Also: Calibrar (calibrar.vercel.app) — multi-tenant SaaS for auto workshops, live with first client · **Chacra** — React Native farm-management app in pilot, 729 tests · **Nihongo Hero** (nihongohero.quest) — Rails learning app, largest contributor on a four-person team

EDUCATION

Associate's Degree in Computer Programming, *Universidad Tecnológica Nacional, Argentina* ***2026 — 2028***
Two-year program (1,375 hours). Programming I–IV, Databases I–II, Systems Architecture & Operating Systems, Systems Methodology I–II, Software Development Management, Introduction to Data Analysis, Statistics.

AI Software Development Bootcamp, *Le Wagon Tokyo, Japan* ***Oct 2025 — Dec 2025***
Intensive 9-week full-stack program focused on web development, databases, APIs, and AI integration. Pair programming, code reviews, and project-based learning to build Ruby on Rails & JavaScript applications.

PROFESSIONAL EXPERIENCE

HOSPITALITY — JAPAN, 2022 — 2025

Front Office Host, Hyatt Centric Ginza Tokyo ***Oct 2024 — Oct 2025***

- Managed high-volume front-desk operations on Property Management Systems; first-line technical troubleshooting and escalation with the IT team.
- Daily bilingual service (Japanese / English) in a five-star environment.

Earlier: *Okinawa UDS · NOVA Holdings · Tokyo American Club* ***2022 — 2024***

ADDITIONAL INFORMATION

Languages: Spanish (native) · English (C2) · Portuguese (B2) · Japanese (conversational, JLPT N3)

Certifications: HTML/CSS & JavaScript, CoderHouse Argentina · Responsive Web Design, freeCodeCamp

Work status: Argentine citizen, no sponsorship required
